

Beaver Falls Classroom News

February 5, 2019

BLAST OFF!

We have become skilled space experts over the past few weeks. The children have been learning about all things SPACE. We had fun playing with the galaxy stones using our hands. We collected moon rocks after landing our rockets on the moon.

The children learned about constellations and even created a few of their own with pipe cleaners and beads. We used our creative side and made a galaxy painting with Miss. Carrie.

We worked our large motor muscles while moving like an astronaut, shooting like a star and rolling like an asteroid.

To wrap up the Astronomy fun, the children each earned an Experienced Astronaut Badge!

Ball Study

As we finish up our ball unit, the children can tell you the difference between a "circle" and a "sphere".

They have had tons of fun learning about the different types of balls and the people that use them. We are eagerly waiting for our bowling trip to experience the fun of using a bowling ball!

A Friendly Reminder

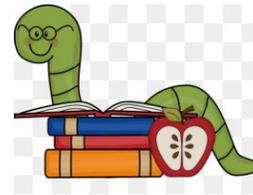

With the very cold temperatures and snowy weather we have been getting, we are asking parents to make sure that they are sending their child to school in boots, hats and mittens.

Nutrition

The children have been doing a great job at getting all of their dishes and helping to set the tables. The children have been great at trying new foods or food they may not have liked before. They are being pretty brave! With the Astronomy unit the past few weeks the children were able to use pretzels and cheese cubes to create their own constellations and created a fruit rocket out of a banana and apple slices. The ball unit sparked quite the investigation... We experimented to see if a pancake would roll, and it did!!

Mr. Miller has been growing celery in the kitchen. Each day he brings it out to show us how much it has grown. We also have cantaloupe seeds in the window and are patiently waiting to see if they sprout!

PATHS

Twiggle and friends have made some recent visits to our center. They have taught us some pretty important things. With the help of Twiggles we learned about our Solution Kits that are in our classroom to help us solve problems we may encounter. We also learned a new word "interrupting". We learned some great ways to not interrupt our friends and teachers while they are talking!

Upcoming Dates to Remember:

February 6th: Field trip to the Croghan Post Office, Library and Bowling Alley.

February 18-22: Mid-Winter Vacation

Starting the week of February 11th we will be contacting you to set up a time to complete our Winter Parent Teacher Conference.
